

REMARKS

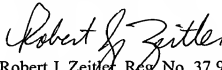

Amendments have been made to the drawing descriptions to correct typographical errors therein. Amendments have been made to remove the unnecessary objects of the invention. No new matter has been included. Entry is requested.

The Examiner indicated that claim 22 was allowable if rewritten into independent form to include all of the limitations of the base claim 20. Applicant has so amended claim 22. In addition, Applicant has amended claim 22 to avoid a §112 rejection. Specifically, "first top slot", "second top slot", "said first bottom slot" and "second bottom slot" have been amended to call them "portion" and it is further defined that "adjacent ones of said first top slot portion, said second top slot portion, said first bottom slot portion and said second bottom slot portion forming a slot such that a plurality of slots are formed". These amendments clarify the claim since claim 20 originally specifies "a terminal positioned within each slot". Applicant has amended the remaining non-canceled claims to be dependent upon amended claim 22. Therefore, Applicant submits that this application is in condition for allowance.

Should the Examiner believe that a telephone conversation will facilitate the prosecution of the above-identified application, the Examiner is invited to call Applicant's attorney.

Respectfully submitted,

MOLEX INCORPORATED
